Katukurunda, Kaluthara

I am excited to apply for the QA Engineer position at your company. As a third-year undergraduate pursuing a BSc (Hons) in Information Technology at the Sri Lanka Institute of Information Technology (SLITT), I am eager to bring my technical expertise, hands-on experience in quality assurance, and passion for ensuring software reliability to your team.

My academic foundation is complemented by practical experience in software testing, including manual and automation testing. During my internship at SLT-MOBITEL, I gained hands-on experience in test case writing, API testing (using tools like Postman and Rest Assured), UI testing (with Selenium WebDriver), and performance testing (using JMeter). I contributed to projects such as the Debt Recovery System (DRS) and Sales Incentive System (SIS), where I collaborated with developers to identify and resolve bugs, ensuring high-quality software delivery.

Additionally, I have worked on projects like the Travel Trails Web App and Skill Sharing Web App, where I performed automated UI testing, API testing, and end-to-end testing. These experiences have honed my skills in test case design, bug tracking, and Agile methodologies, further solidifying my ability to thrive in a dynamic QA environment.

Beyond technical skills, I possess strong analytical thinking, attention to detail, and problem-solving abilities—qualities essential for effective QA work. My familiarity with version control (Git/GitHub) and databases (MySQL, MongoDB) allows me to integrate seamlessly into development and testing workflows.

I am enthusiastic about the opportunity to contribute my skills to your company and learn from your team. I would welcome the chance to discuss how my background aligns with your needs. Please find my resume attached for your review.

Thank you for your time and consideration. I look forward to the possibility of contributing to your team and am available at your convenience for an interview.

Best regards,
Sanduni Vandana
